1.0 Introduction

1.1 Study Area Location

The Dorchester County Sales Tax Transportation Authority (DCTA), through an Intergovernmental Agreement with the South Carolina Department of Transportation (SCDOT) proposes to improve US Highway 78 from approximately 0.68 miles northwest of Orangeburg Road to approximately 0.4 miles east of the Berlin Myers Parkway (BMP) in Dorchester County and Summerville, South Carolina. Davis & Floyd, Inc. conducted a limited hazardous materials survey of the proposed improvement areas.

The purpose of this assessment was to review available limited historical information and perform a site visit to determine if there are any existing or potential hazardous material or petroleum sites located within or adjacent to the planned construction areas. The site evaluation procedures conducted during the assessment are summarized as follows:

- Review of State lists of environmentally regulated sites (underground storage tank sites), in an effort to identify those sites with documented contamination, and also those sites considered as potential sources of contamination;
- Physical inspection and documentation of conditions on or near the project site;
- Documentation of findings including appropriate site location information.

The study area as described above was about 8.18 miles along the US 78 route. See the map of the study area in Appendix 1 and see project location map below.

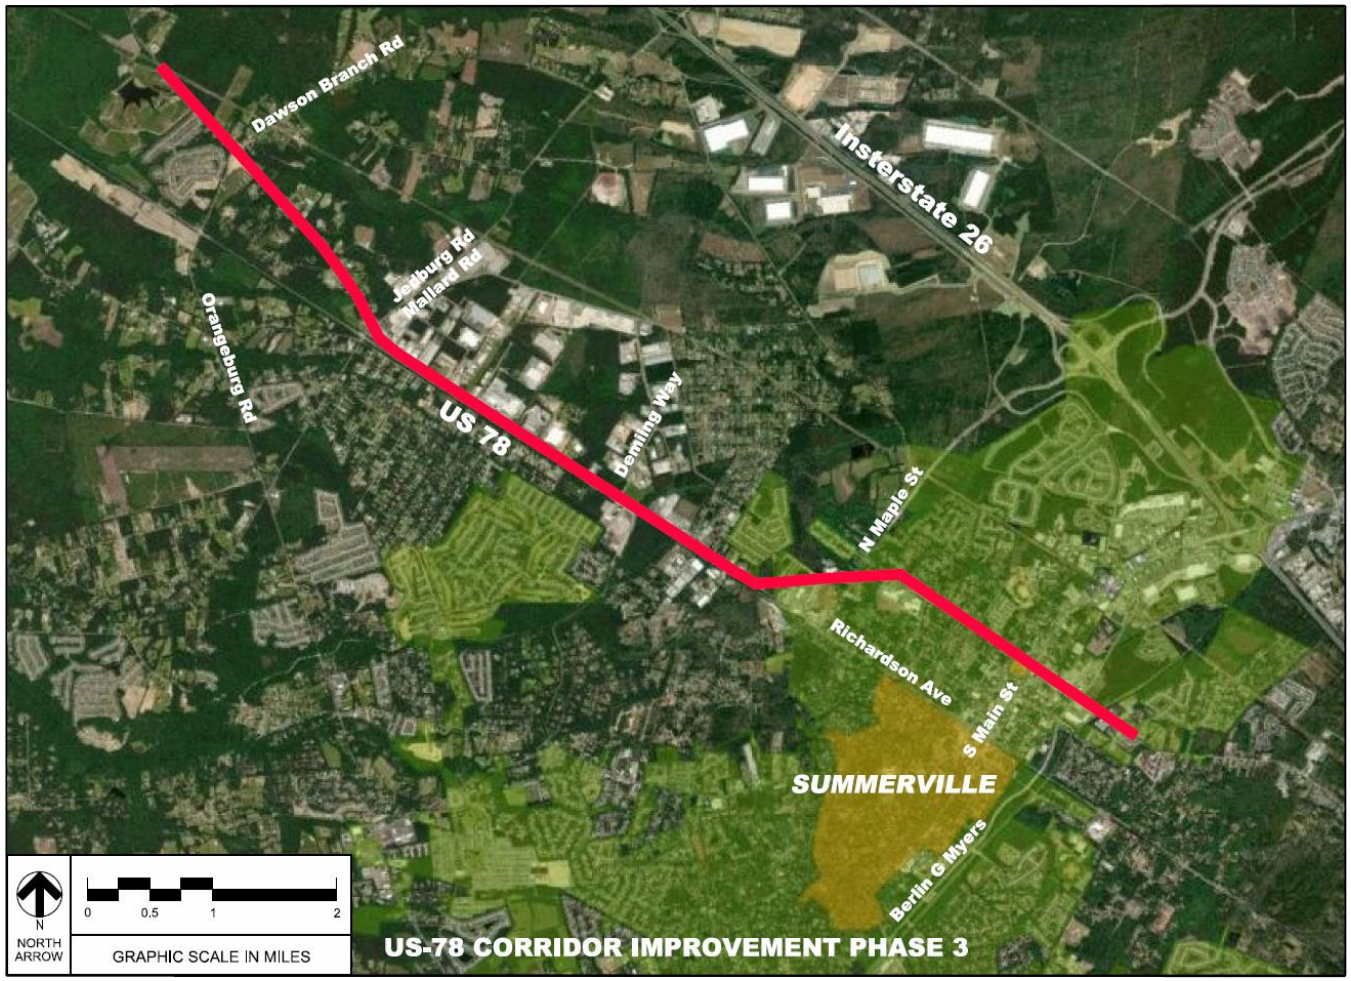

Figure 1: Project Location Map

1.2 Purpose

The purpose of this assessment was to determine if there are any existing or potential hazardous material/waste sites located within or adjacent to the planned construction areas and review available limited historical information and perform site visits. The site evaluation procedures conducted during the assessment are summarized as follows:

- ❖ Review of Federal, State, and local lists of environmentally regulated sites (underground storage tank sites) out to distances specified by the ASTM E 1527-13 and AAI standards, in an effort to identify those sites with documented contamination, and also those sites considered as potential sources of contamination;

- ❖ Review available historical Sanborn maps and historical aerial photographs of the project area to evaluate past uses in the study area;
- ❖ Physical inspection and documentation of conditions on or near the limited assessment areas;
- ❖ Documentation of findings including appropriate site location information.

2.0 Historical and Regulatory Review

2.1 Historical

2.1.1 Aerial Photographs

Historical aerial photographs from several sources were reviewed. Limited historical aerial photographs from 1989, 1994, 2005, 2013, and 2016 were available for the study area. Appendix 2 has copies of the historical aerial photographs. The historical aerial photographs were available online from Google Earth maps. Birds-eye views of potential hazardous materials sites were available from the Microsoft Bing Search Maps website.

The historical aerial photographs from 1989 thru 2016 revealed generally the same amount of general rural areas along the first 2 miles of Phase 3 study area to the intersection at Jedburg Road with industrial development along the last 3 miles of the Phase 3 project ending just north of W. Richardson Avenue. The remaining 2 miles in the Phase 3 study area went through the populated residential and developed business areas along w. 5th N. St. and E. 5th N. St. inside the Town of Summerville. Along Phase 3 the rural areas had farmlands, farm residential areas, woodlands, and wetlands with the main development at major intersections. The last 3 miles into Summerville had major industrial development on the north side of US Hwy 78 (W. 5th N. St.) and railroad tracks located on the south side of the highway approximately 120 feet from the centerline of the roadway. The in town Phase 3 areas showed general business development and long standing residential areas. The now KapStone Kraft lumber mill was located on the south side of the roadway at the beginning of W. Richardson Avenue to Maple St. From Maple St. westward to Cedar St. was mainly residential, schools, and small businesses. From Cedar St. to the end of the study area beyond the Berlin Myers Parkway and Saw Mill Branch was the typical business areas along US Hwy 78 into downtown Summerville. The historical aerial photographs of the potential hazardous material sites can be found in Appendix 2 of this report. The site #s below are referenced to the Initial Assessment Summary Table located in Appendix 8.

Site #1 – Speedway 2838 gas station was located at 2908 W. 5th N. Street, Summerville, SC at the northwest quadrant of the intersection of US Hwy 78 and Jedburg Road. Historical aerial photographs from 1989 show no convenience store located on the site at that time.

Site #2 – the Former Pantry 887 (now Circle K) was located at 2895 W. 5th N. Street, Summerville, SC at the northeast quadrant of the US Hwy 78 and Jedburg Road intersection. The former Pantry was evident in the 1989 historical aerial photograph. In the 1994 historical aerial photograph, there was some type of structure on the Hess site, but it did not appear to be a convenience store. The 2005 and later historical

aerial photographs show the current condition with convenience store structures and pump islands at both the Speedway site and the Circle K site.

Site #3 – 52 Station #4 convenience store was located at 1525 W. 5th N. Street, Summerville, SC on the north side of US Hwy 78. Historical aerial photographs from 1989 and 1994 show the convenience store in operation at this time. According to SCDHEC records USTs were not installed at the location until 1998. The historical aerial photographs from 2005 and later show the current conditions with gasoline pumps at this site.

Site #4 – Busy Corner 3 convenience store was located at 1500 W. 5th N. Street, Summerville, SC where US Hwy 78 meets W. Richardson Avenue. The historical aerial photographs from 1989 show the convenience store in operation at that time. There was generally no development on either side of the highway at the site. The historical aerial photographs from 1994, 2005, 2010, and later showed similar conditions with gasoline pumps at this site. This site is to be demolished as part of the planned roadway improvements.

Site #6 – An Abandoned Service Station was previously located at 930 W. 5th N. St. at the SE quadrant of the intersection with Maple St. The 1989 historical aerial photograph showed a store building. According to SCDHEC records the UST was last used prior to 1973 but not removed until 2014. . The historical aerial photographs from 1994, 2005, 2010, and 2013 showed similar conditions with a building on the site. The building was removed in 2015.

Site #9 – American Federal Auto LLC (Former Freeman Tire Store) was located at 711 W. 5th N. St. The 1994 historical aerial photograph showed the site in operation. According to SCDHEC records USTs were removed from the site in 1998. Subsequent historical aerial photographs from 2005 and later show current conditions at the site.

Site #10 – Circle K (Former Pantry #593) was located at 201 W. 5th N. St. The 1989 historical aerial photograph showed the site in operation. According to SCDHEC records USTs were installed in 1987. Subsequent historical aerial photographs from 1994 and later show current conditions at the site.

Site #11 – Checkers restaurant (Davis Texaco site) was located at 601 N. Main St. The 1989 historical aerial photograph showed the site in operation. According to SCDHEC records USTs were removed in December 1989. The 1994 historical aerial photograph showed the gas station had been removed and a restaurant was on the site. Subsequent historical aerial photographs from 2005 and later showed current conditions at the site with a fast-food drive-thru restaurant.

Site #12 – Circle K (former BP Oil site) was located at 527 N. Main St. The 1989 historical aerial photograph showed the site in operation. Subsequent historical aerial photographs from 1994 and later show current conditions at the site.

Site #14 – Former Warehouse Distributing site was located at 605 N. Magnolia St. The 1989 historical aerial photograph showed the site in operation. The location was not located near the roadway improvements along US Hwy 78. Subsequent historical aerial photographs from 1994 and later show current conditions at the site.

Site #15 – Former Opal 25 gas station was located at 202 E. 5th N. St. The 1989 historical aerial photograph showed the site in operation. According to SCDHEC records all USTs were removed in December 1991. Subsequent historical aerial photographs from 1994 and later show current conditions at the site.

Site #16 – Former Goodyear Tire & Rubber Co. was located at 211 E. 5th N. St. The 1989 historical aerial photograph showed the site in operation. According to SCDHEC records all USTs were removed in December 1994. The location was not located near the roadway improvements along US Hwy 78. Subsequent historical aerial photographs from 1994 and later show current conditions at the site.

Site #17 – Former Summerville Sports Marine site was located at 210 E. 5th N. St. The 1989 historical aerial photograph showed the site in operation. According to SCDHEC records two USTs were removed in September 1991. Subsequent historical aerial photographs from 1994 and later show current conditions at the site.

Site #18 – The County Electric Supply Co. was located at 320 E. 5th N. St. According to SCDHEC records the UST was last used in 1973 and was removed in July 1998. The 1989 historical aerial photograph showed the site in operation. Subsequent historical aerial photographs from 1994 and later show current conditions at the site operating as the County Electric Supply Co.

Site #19 – The Spinx 359 gas station was located at 396 E. 5th N. St. Historical aerial photographs from 1994 thru 2013 showed no development at this site location. The 2016 aerial photograph showed the current gas station operation. SCDHEC documents indicate the USTs at the Spinx station were installed in 2015.

Site #20 – Former CO Auto Exxon Service Station was located at 405 E. 5th N. St. The 1989 historical aerial photograph showed the site in operation. According to SCDHEC records eight USTs were removed in December 1991. Subsequent historical aerial photographs from 1994 and later show current conditions at the site. The site operates as DisasterCare/Carpet Care Services with multiple monitoring wells at the site.

Site #21 – Former American Bakeries Co. site was located at 409 E. 5th N. St. The 1989 historical aerial photograph showed the site in operation. According to SCDHEC records the one UST was removed in May 1992. Subsequent historical aerial photographs from 1994 and later show current conditions at the site.

2.1.2 Sanborn Maps

Sanborn Fire Insurance map collections were reviewed by EDR, Inc. to determine if any maps depicted the limited study area. A limited number of Sanborn Fire Insurance maps from years 1928 and 1944 were available for a portion of the study area. This area being the intersection of E. 5th N. St. and Main Street (Hwy 17). A copy of the appropriate Sanborn maps can be found in Appendix 3.

The review of these Sanborn maps revealed two filling stations located on two corners (NE and SE quadrants) of the intersection. Current and former filling station locations would be locations that may have had aboveground or underground storage tanks (UST) used to store fuel or other petroleum

products. The 1928 Sanborn map showed that the NE quadrant lot had two aboveground gasoline storage tanks. The SE quadrant lot also had two aboveground gasoline storage tanks. The 1944 Sanborn map showed three aboveground gasoline storage tanks at both filling station locations. There were no other Sanborn maps that depicted the study area. Both of these filling stations eventually changed to having underground petroleum storage tanks. The SE quadrant lot still operates as a gas station (Circle K convenience store at 527 N. Main St.). The NE quadrant lot is no longer a gas station and had a fast food establishment (Checkers at 601 N. Main St.).

2.1.3 Historical Topographic Maps

Historical topographic maps for review were available from the United States Geographical Service (USGS) website for years 1954, 1969, 1985, and 1990. The historical topographic maps can be found in the appendices. None of the historical USGS topographical maps showed much detail regarding industrial activities along the study area (US 78) to be beneficial in this evaluation.

2.2 Regulatory

2.2.1 SCDHEC UST Registry Review & Environmental Database Review

Davis & Floyd, Inc. contracted Environmental Data Resources, Inc. (EDR) to perform a search of standard Federal and State environmental databases required by ASTM E 1527-13. The EDR report also contains a review of additional databases not required by this ASTM standard. A copy of pertinent sections of the EDR DataMap™ – Environmental Atlas™ report is included in Appendix 5 of the report. The EDR report included information on the whole Phase 3 study area. The plotted sites on the EDR maps were not necessarily accurate, so field reconnaissance was used to determine if a plotted site was actually of concern to the road widening project area. The SCDHEC Underground Storage Tank (UST) Registry Search website was used to review all registered USTs in the vicinity of the study area along Phases 3. SCDHEC representative, Mr. Read Miner (803-898-0608), was contacted to determine the status of the UST sites. There were several current and former UST sites located in or adjacent to the limited study area. Mr. Minor provided some site maps of several UST locations. The maps were not high quality, but do show possible locations of monitoring wells. These maps can be found in the appendices. The following UST sites were the only actual sites of potential concern and will be discussed below. The **red** EDR Map ID#s depicted in the descriptions below correspond to the **red** ID#s on the following EDR Report map.

Site #1. **EDR Map ID 4**: The Speedway 2838 – located at 2908 W. 5th N. St. on Tract 343, (UST ID# 18414) had two active tanks in use (one 20K gasoline tank and one 10K gasoline tanks). Two previous releases were reported on November 19, 2007 and February 6, 2015. Site received No Further Action (NFA) notices on May 30, 2008 and February 17, 2015. A previous monitoring well had been abandoned per SCDHEC. Based on site reconnaissance there did not appear to be any remaining appurtenances from the UST system within the proposed construction ROW. This site does not appear to have an environmental impact on the planned roadway improvements.

Site #2. **EDR Map ID 6**: The Circle K (Former Pantry 887) (SCDHEC ID# 03028) was located at 2895 W. 5th N. Street, on Tract 346 at the intersection of Jedburg Road and US Hwy 78

(northeast quadrant). The site had four USTs in service. A release was reported on December 20, 1991. No NFA has been issued. The site is currently under corrective action with SCDHEC. Multiple monitoring wells were located on the site as well as on adjacent properties and on property across US 78. There were monitoring wells located at this site which may be near the proposed roadway improvements area. The design of the roadway improvements at these monitoring well locations should be coordinated with SCDHEC to determine if the monitoring wells must be replaced after construction or just protected during roadway improvements. This site does appear to have a potential environmental impact on the planned roadway improvements.

Site #3. **EDR Map ID 26**: The 52 Station #4 was located on Tract 373 at 1525 W. 5th N. St. (UST ID#01841). Two USTs were in service. No releases have been reported to SCDHEC. This site does not appear to have an environmental impact on the planned roadway improvements

Site #4. **EDR Map ID 37**: The Busy Corner 3 (SCDHEC ID# 11683) was located on Tract 384 at 1500 W. 5th N. St., at the intersection with W. Richardson Street. This site had four USTs currently in use. Releases had been reported on December 13, 1989 and October 9, 2007. The site has multiple groundwater monitoring wells located within the site used for assessment purposes. The 2007 release was issued a NFA on December 13, 2007. The 1989 release was recently issued a NFA on August 5, 2010. SCDHEC indicated that all the monitoring wells were to have been abandoned. All structures on this site are demolition items as part of the proposed roadway improvements. This site does appear to have a potential environmental impact on the planned roadway improvements as the current UST systems will have to be properly abandoned and assessed in accordance with SCDHEC regulations.

Site #6. **EDR Map ID 33**: The Abandoned Service Station was located on Tract 14 at 930 W. 5th N. St. (UST ID#014815). Previous UST was last used in 1973. UST was removed December 16, 2014. Previous releases reported to SCDHEC were NFA'd July 13, 1995, February 24, 2015 and April 10, 2015. The building at the site was removed in 2015. This site does not appear to have an environmental impact on the planned roadway improvements

Site #7. **EDR Map ID 41**: The KapStone Kraft lumber mill (UST ID# 02963) located at 309 Maple St. on Tract 2 had eight USTs abandoned in place prior to the SCDHEC regulations. This site was not located near the roadway improvements along US 78. This site does not appear to have an environmental impact on the planned roadway improvements.

Site #9. **EDR Map ID 42**: The Former Freeman Tire (now American Federal Auto LLC) (SCDHEC ID# 18061) was located at 711 W. 5th N. Street, on Tract 41. The site had two USTs removed on June 9, 1998. A release was reported on February 27, 1998. No NFA has been issued. The site is currently under assessment with SCDHEC. Multiple monitoring wells were located on the site. There were monitoring wells located at this site which may be near the proposed roadway improvements area. The design of the roadway improvements at these monitoring well locations should be coordinated with SCDHEC to determine if the

monitoring wells must be replaced after construction or just protected during roadway improvements. This site does appear to have a potential environmental impact on the planned roadway improvements.

Site #10. **EDR Map ID 47**: The Circle K (Former Pantry 593) (SCDHEC ID# 10367) was located at 201 W. 5th N. Street, on Tract 74. The site had three USTs in service. Two USTs were removed on April 1, 1987. Two releases were reported on January 12, 1987 and October 13, 2000. Both releases have been NFA'd on January 27, 1999 and December 11, 2000. There were three possible abandoned monitoring wells at the site, though not near the roadway improvements area. This site does not appear to have an environmental impact on the planned roadway improvements.

Site #11. **EDR Map ID 49**: The Former Davis Texaco station was located on Tract 83 at 601 N. Main St. (UST ID#03023). Four USTs were removed on December 14, 1989. Release was reported on December 20, 1989 and NFA'd on January 25, 2007. There were four abandoned monitoring wells observed on the site. This site does not appear to have an environmental impact on the planned roadway improvements.

Site #12. **EDR Map ID 49**: The Circle K (Former BP Oil site) (SCDHEC ID# 02934) was located at 527 N. Main St. on Tract 87. The site had four USTs in service. Two releases were reported on April 25, 1984 and May 29, 1998. Both releases have been NFA'd on September 23, 2013 and August 25, 1998. There were four possible abandoned monitoring wells observed at the site and on the adjacent Edwards Auto property. SCDHEC representative indicated that all monitoring wells had been abandoned. Some abandoned monitoring wells had been located along and near the US Hwy 78 roadway improvements. This site does not appear to have an environmental impact on the planned roadway improvements.

Site #14. **EDR Map ID 48**: The Former Warehouse Distributing site was located on Tract 93 at 605 N. Magnolia St. (UST ID#03062). One UST was removed on December 10, 1991. Release was reported on December 31, 1991 and NFA'd on August 29, 1994. There were no abandoned monitoring wells observed on the site. This site does not appear to have an environmental impact on the planned roadway improvements.

Site #15. **EDR Map ID 52**: The Former Opal 25 was located on Tract 90 at 202 E. 5th N. St. (UST ID#03067). Seven USTs were removed on September 21, 1991. One release was reported on January 2, 1990 and NFA'd on May 9, 2007. No monitoring wells were observed at the site. This site does not appear to have an environmental impact on the planned roadway improvements.

Site #16. **EDR Map ID 52**: The Former Goodyear Tire & Rubber Co. site was located on Tract 96 at 211 E. 5th N. St. (UST ID#09553). One UST was removed on December 19, 1994. Release was reported on February 9, 1995 and NFA'd on April 21, 1995. There were no abandoned monitoring wells observed on the site. This site does not appear to have an environmental impact on the planned roadway improvements.

Site #17. **EDR Map ID 52**: The Former Summerville Sports Marine site (SCDHEC ID# 12743) was located at 201 E. 5th N. St. on Tract 92. Two USTs were removed on September 12, 1991. A release was reported on December 30, 1991. The site was NFA'd on December 20, 2000. There were several possibly abandoned monitoring wells observed at the site. SCDHEC representative indicated that there was one active monitoring well at the site located in the paved parking area approximately 44 feet from Gum St. This site does not appear to have an environmental impact on the planned roadway improvements.

Site #18. **EDR Map ID 57**: The County Electric Supply Co. site was located on Tract 103 at 320 E. 5th N. St. (UST ID#17476). The UST was last used in December 1973. The tank were removed on July 22, 1998. Release was reported on August 20, 1998 and NFA'd on December 13, 1998. There were no abandoned monitoring wells observed on the site. This site does not appear to have an environmental impact on the planned roadway improvements.

Site #19. **EDR Map ID 63**: The Spinx 359 gas station (UST ID# 19799) was located at 396 E. 5th N. St. on Tract 175 had two USTs in service. The station is located on the SE quadrant of the intersection of E. 5th N. St. and the Berlin Myers Parkway. The USTs are located along about 26 feet from sidewalk along BMP. This site does not appear to have an environmental impact on the planned roadway improvements.

Site #20. **EDR Map ID 66**: The former CO Auto Exxon Service Station (now DisasterCare/Carpet Care Specialists) (SCDHEC ID# 11953) was located at 405 E. 5th N. Street, on Tract 109. The site had eight USTs removed on December 20, 1991. A release was reported on December 31, 1991. No NFA has been issued. The site is currently under assessment and corrective action with SCDHEC. Multiple monitoring wells were located on the site. There were monitoring wells located at this site which may be near the proposed roadway improvements area. SCDHEC representative stated that there were other monitoring wells associated with this site located toward Saw Mill Branch and located on the south side of US Hwy 78. The design of the roadway improvements at these monitoring well locations should be coordinated with SCDHEC to determine if the monitoring wells must be replaced after construction or just protected during roadway improvements. This site does appear to have a potential environmental impact on the planned roadway improvements.

Site #21. **EDR Map ID 68**: The Former American Bakeries Co. site was located on Tract 109 at 409 E. 5th N. St. (UST ID#02956). The UST was removed on May 6, 1992. Release was reported on October 25, 1993 and NFA'd on February 2, 1995. There were no abandoned monitoring wells observed on the site. This site does not appear to have an environmental impact on the planned roadway improvements.

2.2.2 SCDHEC Dry-cleaning Facility Restoration Trust Fund Review

The SCDHEC Dry-cleaning Facility Restoration Trust Fund (DFRTF) list was reviewed to see if any current or former drycleaners were located within the limited study area. Based on the most up to date available (dated January 2017) online list from the SCDHEC website, there was only one current or former dry-cleaning facilities located in the study area. This was the Davis Modernize of Summerville, Inc. located at

523 N. Main St. This site was located behind the Circle K convenience store approximately 275 feet from E. 5th N. St. There did not appear to be any issues with this dry-cleaning location relative to the roadway improvements on US 78.

3.0 Site Reconnaissance

The study areas were inspected on March 9, 2017. Inspections were made by riding along the study areas and by walking along all pertinent areas. Each of the listed SCDHEC underground storage tanks sites were visited to determine if there appeared to be any obvious environmental issues within the proposed road widening areas. The site reconnaissance was performed to identify visual signs of past or existing contamination on or adjacent to study area. During the field reconnaissance of the study area, there were several sites with potential environmental issues noted in or near the SCDOT ROW areas where improvements are planned. Appropriate site reconnaissance photographs are located in the appendices which depict these areas of concern along the limited study area.

The beginning of the Phase 3 study area at the western end there was mostly rural lands and no industrial or commercial development. There was a new residential subdivision, Drakesborough, located on the south side of US Hwy 78 between the project beginning and Orangeburg Road. The study area remained rural until nearing Jedburg Road and Mallard Road. At this intersection there were two gas stations with underground storage tanks in use. The Circle K gas station had USTs and monitoring wells located such that they may be impacted by the proposed roadway improvements.

Proceeding eastward on US Hwy 78 is the beginning of the industrial area with many industries on the north side of the highway. On the south side of the highway was a buffer area and a railroad track with several spur tracks into the industrial area. Most of the industries had operation and buildings that were not located immediately along the roadway. Therefore, there were no hazardous material areas noted or observed in this industrial area on US Hwy 78. Where Industrial Road intersected with US Hwy 78, there was a gas station (52 Station #4 – 1525 W. 5th N. St.) with two USTs that were not located near the roadway and there were no monitoring wells observed at the site. Proceeding westward to the intersection with US Hwy 78 and W. Richardson Avenue was the Busy Corner 3 gas station. This location had USTs in service and abandoned monitoring wells located on the site. This whole location is to be demolished as part of the roadway improvements. An UST abandonment assessment in accordance with SCDHEC guidelines will have to be conducted at this location checking for evidence of releases from the tanks, pump islands, and piping.

Proceeding northeast along W. 5th N. St. toward Maple St. was the KapStone Kraft Lumber Mill on the south side of the roadway and several auto and truck repair businesses. At the Maple St. intersection there was a lot that previously had an abandoned service station. The previous building on the lot had been removed. Proceeding further westward along W. 5th N. St. were several residential lots, more businesses and the new Alston-Bailey Elementary School and Alston Middle School at Bryan St.

Proceeding westward were residential properties on the south side of the roadway and various businesses on the north side of the road. On the north side was the American Federal Auto LLC site (Former Freeman Tire site) located at 711 W. 5th N. St. This site previously had USTs and there were several monitoring wells (some abandoned and some still active) observed at the site. Some wells were observed near the roadway and should be evaluated during roadway design to determine if the wells may impact the roadway improvements.

For the next 4-5 blocks along the study area were mainly residential properties and some small businesses. At the corner of N. Cedar St. and W. 5th N. St. was the Circle K gas station (201 W. 5th N. St.) with USTs. There were abandoned monitoring wells located at this site, but none were observed to be near the roadway improvements area.

The remainder of the study area was the business portion of West and East 5th N. St. At the intersection of Main St. (US Hwy 17) and US Hwy 78 was the Checkers restaurant locate at 601 N. Main St. This was the site of the Former Davis Texaco UST site. Four abandoned monitoring wells were observed in the parking lot and sidewalk areas. Across the street was the Circle K gas station (527 N. Main St.) with four USTs in service. The USTs were located about 31 feet from the travel lane on US Hwy 78. There were also abandoned monitoring wells associated with this site located in the parking lot of the adjacent Edwards Automotive.

The former Warehouse Distributing site at 605 N. Magnolia St. previously had a UST. No environmental issues were observed. The Former Opal 25 gas station site was located at 202 E. 5th N. St. and was abandoned. The property was not being used. There were no environmental issues observed. The former Goodyear Tire and Rubber Co. located at 211 E. 5th N. St. previously had a UST. There were no environmental issues observed.

The Former Summerville Sports Marine site located at 210 E. 5th N. St. previously two USTs. There were several monitoring wells observed at the site. One active monitoring well was located about 44 feet from the travel lane on Gum St. There were no other environmental issues observed. The County Electrical Supply Co. was located at 320 E. 5th N. St. previously had one UST. There were no other environmental issues observed.

The Spinx 359 gas station was located at 396 E. 5th N. St. at the SE corner of the intersection of US Hwy 78 and the Berlin Myers Parkway. This was a new station that opened up in 2015. The USTs were located along the BMP side of the property about 26 feet from the sidewalk. There were no environmental issues observed.

The Former C O Auto Exxon Service Station was located at 405 E. 5th N. St. The site now operates as DisasterCare – Carpet Care Specialists. Eight USTs were removed in 1991. There were monitoring wells located at this site which may be near the proposed roadway improvements area. SCDHEC representative stated that there were other monitoring wells associated with this site located toward Saw Mill Branch and located on the south side of US Hwy 78. The design of the roadway improvements at these monitoring

well locations should be coordinated with SCDHEC to determine if the monitoring wells must be replaced after construction or just protected during roadway improvements. This site does appear to have a potential environmental impact on the planned roadway improvements.

The former American Bakeries Co. was located at 409 E. 5th N. St next door to the DisasterCare site. This site previously had one UST which was removed in 1992. No environmental issues were observed.

4.0 Opinion

Based on the review of historical aerial photographs, environmental database information, regulatory information, and a site reconnaissance of the study areas, there does appear to be five site locations that may have an environmental impact on the roadway improvements. These areas include:

1. The Circle K (Former Pantry 887) (SCDHEC ID# 03028) was located at 2895 W. 5th N. Street at the intersection of Jedburg Road and US Hwy 78 (northeast quadrant). The site has four USTs in service. The site was currently under corrective action with SCDHEC. Multiple monitoring wells were located on the site as well as on adjacent properties and on property across US 78. There were monitoring wells located at this site which may be near the proposed roadway improvements area. The design of the roadway improvements at these monitoring well locations should be coordinated with SCDHEC to determine if the monitoring wells must be replaced after construction or just protected during roadway improvements.

2. The Busy Corner 3 (SCDHEC ID# 11683) was located at 1500 W. 5th N. St., at the intersection with W. Richardson Street. This site has four USTs in service. The site had multiple groundwater monitoring wells located within the site used for assessment purposes. SCDHEC indicated that all the monitoring wells were to have been abandoned. All structures on this site are demolition items as part of the proposed roadway improvements. This site does appear to have a potential environmental impact on the planned roadway improvements as the current UST systems will have to be properly abandoned and assessed in accordance with SCDHEC regulations.

3. The Former Freeman Tire (now American Federal Auto LLC) (SCDHEC ID# 18061) was located at 711 W. 5th N. Street. The site had two USTs removed on June 9, 1998. A release was reported on February 27, 1998. No NFA has been issued. The site was currently under assessment with SCDHEC. Multiple monitoring wells were located on the site. There were monitoring wells located at this site which may be near the proposed roadway improvements area. The design of the roadway improvements at these monitoring well locations should be coordinated with SCDHEC to determine if the monitoring wells must be replaced after construction or just protected during roadway improvements.

4. The Circle K (Former BP Oil site) (SCDHEC ID# 02934) was located at 527 N. Main St. The site had four USTs in service. There were four possible abandoned monitoring wells

observed at the site and on the adjacent Edwards Auto property. SCDHEC representative indicated that all monitoring wells had been abandoned. Some abandoned monitoring wells had been located along and near the US Hwy 78 roadway improvements near the sidewalk area. This site appears to potentially have an environmental impact on the planned roadway improvements. Contractor should be aware of possible abandoned monitoring wells located near the current roadway.

5. The former C O Auto Exxon Service Station (now DisasterCare/Carpet Care Specialists) (SCDHEC ID# 11953) was located at 405 E. 5th N. Street. The site had eight USTs removed on December 20, 1991. A release was reported on December 31, 1991. No NFA has been issued. The site is currently under assessment and corrective action with SCDHEC. Multiple monitoring wells were located on the site. There were monitoring wells located at this site which may be near the proposed roadway improvements area. SCDHEC representative stated that there were other monitoring wells associated with this site located toward Saw Mill Branch and located on the south side of US Hwy 78. The design of the roadway improvements at these monitoring well locations should be coordinated with SCDHEC to determine if the monitoring wells must be replaced after construction or just protected during roadway improvements.

5.0 Limitations

5.1 Limitations and Exceptions of Assessment

Appropriate inquiry has been conducted in order to identify recognized environmental conditions in the limited study area. However, no environmental site assessment can completely eliminate uncertainty regarding the potential for other unidentified environmental conditions in connection with a property site. In essence, an appropriate inquiry does not mean an exhaustive assessment of a subject property site. The findings and conclusions presented in this report are based on the results of the site reconnaissance, review of the specified regulatory records, review of available historical records, and interviews conducted with persons knowledgeable of the site and properties in the vicinity. The findings are applicable and representative of conditions encountered at the subject site on the dates of the evaluation, and may not represent conditions at a later date. The review of public records was limited to that information that was available to Davis & Floyd, Inc. (D&F) at the time this report was written. However, the accuracy and completeness of the records and the information provided by the knowledgeable persons interviewed cannot be certified. Materials and information used for this report were obtained by D&F from “reasonably ascertainable” and “practically reviewable” sources in compliance with our understanding of the standards set forth by ASTM E 1527-13.

In addition, the absence of indicators (suggesting that hazardous materials, petroleum products, or Polychlorinated Biphenyls (PCBs) have not impacted the site) does not preclude the presence of these materials in the limited study area. No extensive sampling or analysis of soil, groundwater, surface waters, or building materials was conducted.

5.2 Special Terms, Conditions, and Reliance

No environmental investigation can preclude the presence of hazardous substances. This report was prepared using the degree of care and skill ordinarily exercised under similar conditions by other professionals practicing in this field. No guarantee of the result of this limited assessment is implied. Findings, opinions, and conclusions of this report are not subject to contamination that is hidden, unpublished, or otherwise unknown using standard methodology.

Our conclusions and recommendations are based upon information provided to us by others and our site observations. Although we cannot be responsible for the accuracy of the data provided by others, we have no reason to believe the information provided is inaccurate. Our observations are based on conditions readily evident at the site at the time of our visits.

Davis & Floyd, Inc., by virtue of providing the services described in this report, does not assume the responsibility of the person(s) in charge of the site, or otherwise undertake responsibility for reporting to any local, state, or federal public agencies any conditions at the site that may present a potential danger to public health, safety, or the environment. The Client agrees to assume all responsibilities for notifying all appropriate local, state, or federal public agencies as required by law, or otherwise to disclose, in a timely manner, any information that may be necessary to prevent any danger to public health, safety, or the environment.

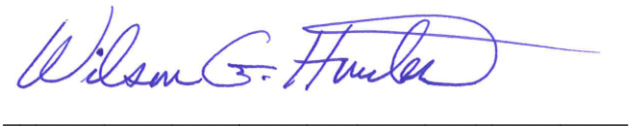
5.3 User Reliance

This report is provided for the exclusive use of the Client and/or their agents on this specific project for which it was prepared. This limited hazardous material survey report has been prepared in accordance with generally accepted environmental practices. No other warranty, expressed or implied, is made. This report should in no way be construed as Davis & Floyd, Inc.'s recommendations to either purchase, sell, or develop the project site.

6.0 Additional Services and References

Site work and research for this limited assessment was conducted by the following:

Davis & Floyd, Inc.:



Wilson G. Hunter, REM

Project Manager, Environmental Professional

6.1 Qualifications of Environmental Professional(s)

Mr. Wilson G. Hunter

Mr. Hunter holds a BS degree in Chemical Engineering from Clemson University and has over 27 years of experience as a consultant in the area of environmental science and compliance. During his employment, he has been assigned to hazardous material projects, preparing Spill Prevention, Control, & Countermeasure (SPCC) Plans, Storm Water Pollution Prevention Plans (SW3P) and Best Management Practices (BMP) Plans, assisting industrial clients with environmental reporting including SARA Title III, EPCRA reporting (Tier II reporting and Toxic Release Inventory [Form R] reporting), hazardous waste reporting, and preparing environmental NPDES permits for wastewater discharges and storm water discharges. He has also assisted industrial clients in Process Safety Management (PSM) plan preparation and audits, and auditing for sediment and erosion control practices on construction projects.

For the last 26 years, Mr. Hunter has conducted Phase 1 environmental assessments and environmental compliance audits for a variety of property types and facilities across the United States. Mr. Hunter has been a Registered Environmental Manager (REM) by the National Registry of Environmental Professionals since 1995 (REM 7653).

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental professional* as defined in §312.10 of 40 CFR §312. I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

The Map ID column refers to the Map ID-Focus Map(s) of the listed site.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/10/2016 has revealed that there are 2

SEMS sites within the searched area.

Site	Address	Map ID
DONWAL SITE	***125 INDUSTRIAL PARK***	***29-14***
215 INDUSTRIAL ROAD	***215 INDUSTRIAL ROAD***	***34-14***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/10/2016 has revealed that there are 2 SEMS-ARCHIVE sites within the searched area.

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-LQG site within the searched area.

Site	Address	Map ID
SCOUT BOATS INC	***2531 HWY 78 W***	***22-10,14***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 8 RCRA-SQG sites within the searched area.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 11 RCRA-CESQG sites within the searched area.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there are 13 RCRA NonGen / NLR sites within the searched area.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 07/15/2016 has revealed that there are 29 FINDS sites within the searched area.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, has revealed that there are 4 US AIRS sites within the searched area.

ABANDONED MINES: An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

A review of the ABANDONED MINES list, as provided by EDR, and dated 06/09/2016 has revealed that there is 1 ABANDONED MINES site within the searched area.

EXECUTIVE SUMMARY

STATE AND LOCAL RECORDS

SHWS: State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

A review of the SHWS list, as provided by EDR, and dated 10/10/2016 has revealed that there are 8 SHWS sites within the searched area.

ALLSITES: The South Carolina Department of Health and Environmental Control is pleased to have the Public Record for your review. The purpose of this database is two-fold. First, it will provide to communities another form of notice of cleanup activity, allowing them to have more information about assessment and cleanup activities in their area and in the State. Second, it can assist those seeking to redevelop brownfield properties within South Carolina.

A review of the ALLSITES list, as provided by EDR, and dated 12/12/2016 has revealed that there are 2 ALLSITES sites within the searched area.

RCR: The Bureau of Land and Waste Management established this Registry to help monitor and maintain sites that have conditional remedies. A Conditional Remedy is an environmental remedy that includes certain qualifications. These qualifications are divided into two major categories: Remedies requiring Land Use Controls and Conditional No Further Actions.

A review of the RCR list, as provided by EDR, and dated 10/10/2016 has revealed that there are 9 RCR sites within the searched area.

EXECUTIVE SUMMARY

NAICS Code: 336612

EDR PROPRIETARY RECORDS

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 25 EDR Hist Auto sites within the searched area.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within the searched area.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.

AIR SYNTHETIC MINOR

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SCOUT BOATS INC (Continued) **1001091456**

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 13735

Waste code: D018
Waste name: BENZENE
Amount (Lbs): 885

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.

AIR EMISSIONS CLASSIFICATION UNKNOWN

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is

Map ID	Site	Database(s)	EPA ID Number

SUMMIT RUBBER COMPANY INCORPORATED (Continued) **1000300439**

used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.

support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.

Registry ID: 110004942769

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

SC-EFIS (South Carolina - Environmental Facility Information System) integrates information on environmental facilities, permits, violations, enforcement actions, and compliance activities needed to support regulatory requirements and target environmental quality improvements for the water, air, solid waste, and hazardous waste program areas. The EFIS was developed by the state of South Carolina and Maine joined their system in 2004.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EPA Waste Code Addendum

SECTION 4 - EPA WASTE CODES

There are no epa codes to report for this search area.

Section 5

Databases Searched and Update Dates

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/05/2016
Date Data Arrived at EDR: 01/05/2017

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/05/2016
Date Data Arrived at EDR: 01/05/2017
Date Made Active in Reports: 02/03/2017

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994

Data Release Frequency: No Update Planned

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/10/2016
Date Data Arrived at EDR: 10/20/2016

Next Scheduled EDR Contact: 05/01/2017
Data Release Frequency: Quarterly

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/18/2014

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/12/2016

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/30/2016

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

STATE AND LOCAL RECORDS

SHWS: Site Assessment Section Project List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

ALLSITES: Site Assessment & Remediation Public Record Database

The South Carolina Department of Health and Environmental Control is pleased to have the Public Record for your review. The purpose of this database is two-fold. First, it will provide to communities another form of notice of cleanup activity, allowing them to have more information about assessment and cleanup activities in their area and in the State. Second, it can assist those seeking to redevelop brownfield properties within South Carolina.

AUL: Land Use Controls

The term Land Use Controls or "LUCs" encompass institutional controls, such as those involved in real estate interests, governmental permitting, zoning, public advisories, deed notices, and other legal restrictions. The term also includes restrictions on access, whether achieved by means of engineered barriers (e.g., fence or concrete pad) or by human means (e.g., the presence of security guards). Additionally, the term includes both affirmative measures to achieve the desired restrictions (e.g., night lighting of an area) and prohibitive directives (e.g., restrictions on certain types of wells for the duration of the corrective action). Considered altogether, the LUCs for a facility will provide a tool for how the property should be used in order to maintain the level of protectiveness that one or more corrective actions were designed to achieve.

EDR PROPRIETARY RECORDS

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248

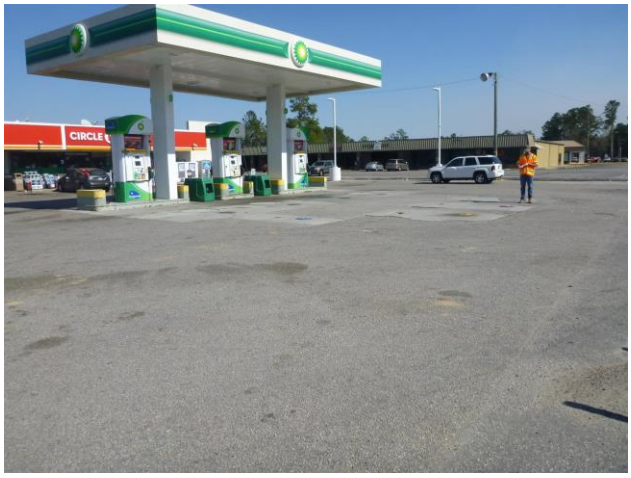
APPENDIX 7

Site Reconnaissance Pictures for Areas of Concern

USTs located at Speedway Gas Station. (#1)
Not located near roadway. No issue with roadway improvements.

USTs and monitoring wells at Circle K. (#2)
Multiple monitoring wells at this site including across the highway. Potential environmental impact on planned roadway improvements.



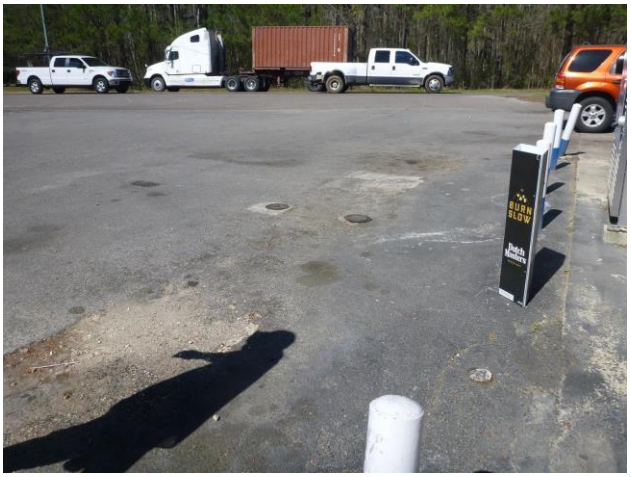
USTs located at Circle K. (#2)
Site currently under corrective action within SUPERB at SSCDHEC.

At Circle K (#2) abandoned monitoring well located about 28 feet from travel lane on US 78.

USTs located at 52 Station #4 (#3) were away from the roadway. This site does not appear to have an environmental impact on planned roadway improvements.

Busy 3 convenience store (#4). Monitoring well located about 15 feet from travel lane on Hwy 78 (W. 5th N. St.).

USTs located at Busy 3 convenience store. Multiple monitoring wells (mostly abandoned) are located around the site.



Other onsite monitoring wells at the Busy 3 convenience store site. This location will be demolished as part of the roadway improvements. UST system will need to have an SCDHEC Abandonment Assessment conducted prior to the roadway improvements to determine if there are any environmental issues associated with the UST system.

The American Federal Auto LLC site (#9). Site is still under assessment with SCDHEC. Possible abandoned monitoring wells near the roadway. Potential environmental impact on planned roadway improvements.

USTs at Circle K convenience store (#10) at 201 W. 5th N. St. This site does not appear to have an environmental impact on planned roadway improvements.

Possible abandoned monitoring well very near the travel lane on US 78 at the American Federal Auto LLC site..

View of some type of valve cover at the Circle K site above.

The Checkers restaurant site (#11) (Former Davis Texaco site) at 601 N. Main St. Site had several abandoned monitoring wells. This site does not appear to have an environmental impact on planned roadway improvements.

Several abandoned monitoring wells at the Checker restaurant site.

Abandoned monitoring well located in sidewalk along US 78 at Checkers restaurant.

Circle K (#12) at 527 N. Main St. USTs located about 35 feet from travel lane. Four USTs in service. SCDHEC representative indicated that all monitoring wells had been abandoned. Observed monitoring wells on the site and on the adjacent Edward's Automotive site. Site plan provided by SCDHEC indicate that several abandoned monitoring wells were located near property line along E. 5th N. St. Potential environmental impact on planned roadway improvements.

Monitoring well associated with the Circle K site located on adjacent Edward's Automotive site.

Former Opal 25 site view of paved areas down toward roadway. No monitoring wells observed on pavement. Only a storm drain catch basin observed.

Former Opal 25 (#15) site located at 202 E. 5th N. St.

Former Summerville Sports Marine (#17) site at 210 E. 5th N. St. with an active monitoring well located in parking lot. Well was located approximately 44 feet from travel lane on Gum St. Other abandoned monitoring wells observed on this site, but none appeared to be near possible roadway improvements.

Former Summerville Sports Marine – view from monitoring well in parking lot toward travel lane on Gum St.

View of Spinx 359 gas station showing the relative distance of the USTs on right to the sidewalk along the BMP.

Spinx 359 Gas Station (#19) site at 396 E. 5th N. St. showing the USTs located adjacent to the Berlin Myers Parkway (BMP). USTs were located ~26 feet from sidewalk along BMP.

Former CO Exxon Service Station (#20) site at 405 E. 5tyh N. St. with monitoring well located ~17.5 feet from travel lane. Site now occupied by DisasterCare/Carpet Care Services. Information from SCDHEC representative indicates that this site has multiple monitoring wells located along the property toward Saw Mill Creek and on property on the other side (south side) of the roadway.

View of monitoring well and old pump islands at the Former CO Exxon Service Station site.

View of monitoring wells at the Former CO Exxon Service Station site.

View of monitoring well at the Former CO Exxon Service Station site.

APPENDIX 8

Initial Assessment Summary Table

US Hwy 78 Improvements

Potential Areas of Concern

Initial Assessment Summary Table- US 78 Improvements - Potential Areas of Concern Near Improvements ROW

Site #	UST Site ID Number	Activity	UST's Present	Contamination Suspected	Testing Recommended or other considerations?	Tract #	Location	ID# on EDR Report
1	18414	Speedway 2838 Gas Station/Convenience Store (2908 W. 5th N. St.)	Yes	No	No - Previous releases NFA'd on 5-1-2008 and 2-17-2015. Previous monitoring well has been abandoned per SCDHEC. No monitoring wells observed at site or near roadway.	343	Speedway 2838	4
2	03028	Circle K Gas Station/Convenience Store (2895 W. 5th N. St.)	Yes	Yes	**Yes** - SIte has four USTs in service. Release reported 12/30/1991. Documented releases have not been NFA'd. Site currently under Corrective Action within SUPERB. Multiple monitoring wells located on the site as well as on adjacent properties and on property across US 78.	346	Circle K - Former Pantry 887	6
3	18211	52 Station #4/Convenience Store (1525 W. 5th N. St.)	Yes	No	No - Site has two USTs in service. USTs not located near roadway. No release has ever been reported. No monitoring wells observed at site.	373	52 Station #4	26
4	11683	Gas Station/Convenience Store (1500 W. 5th N. St.)	Yes	Yes	**Yes** - Site has four USTs in service and monitoring wells within ROW. NFA'd 12/13/2007 & 8-5-2010. DHEC rep Read Minor indicated that monitoring wells were to have been abandoned. When site closes down a UST Abandonment Assessment will be required checking for any releases at tanks, pump islands, and piping.	384	Busy Corner 3 - all buildings on site are demo items	37
5	-	Auto Repair - (1011 W. 5th N. St.)	No	No	No - No issues observed near the roadway ROW.	5	Hill's Automotive LLC	31
6	14815	Abandoned Service Station (930 W. 5th N. St.)	No	No	No - Abandoned UST removed 12/16/2014. Previous releases NFA'd on 7/13/1995, 2/24/2015, & 4/10/2015. No monitoring wells observed at site or near roadway. Building removed in 2015.	14	Property owned by Sunoco, Inc.	33
7	02963	Kapstone Lumber Operation - former Westvaco (309 Maple St.)	No	No	No - Eight USTs abandoned (filled with concrete) prior to current UST regulations. No release reported. Not located near the roadway ROW.	2	Kapstone	41
8	-	Darrell's Auto Repair (717 W. 5th N. St.)	No	No	No - No issues observed near the roadway ROW.	39	Darrell's Auto-Truck Repair	39
9	18061	American Federal Auto LLC (711 W. 5th N. St.)	No	Yes	**Yes** - Two USTs removed in 1998. Release reported 1998. No NFA date. Monitoring wells and abandoned monitoring wells observed on site. Possible abandoned MW near roadway ROW. SCDHEC representative stated that responsible party has not complied with SCDHEC assessment directives.	41	Former Freeman Tire site	42
10	10367	Circle K (201 W. 5th N. St.)	Yes	No	No - Three USTs in service. Two USTs removed 4-1-87. Two releases reported. Both NFA'd 1/27/99 and 12/11/2000. Three possible abandoned monitoring wells. Possible monitoring well(s) offsite. 100 gallon spill by tanker operator on 5/5/2000.	74	Former Pantry #593	47
11	03023	Checkers (Former Davis Texaco) - (601 N. Main St.)	No	No	No - Four USTs removed 12/14/1989. One release reported 12/20/1989. NFA on 1/25/2007. Four abandoned (cement-filled) monitoring wells observed at the site, not near the roadway ROW.	83	Former Davis Texaco	49
12	02934	Circle K (527 N. Main St.)	Yes	Maybe	**Yes** - Four USTs in use. Two releases reported. NFA'd on 8/25/1998 and 9/23/2013. USTs located about 30.5 feet from edge of roadway US 78. SCDHEC representative indicated that all monitoring wells were abandoned. Observed four monitoring wells on site and two monitoring wells on adjacent Edwards Auto property. Some abandoned monitoring wells would have been located within roadway ROW along US 78 but were not visible during site reconnaissance.	87	Circle K (Former BP Oil site)	49
13	-	Edwards Automotive (114 E. 5th N. St.)	No	No	No USTs observed, but did observe at least two monitoring wells that were not abandoned. These may be monitoring wells associated with adjacent Circle K site.	88	Former Transmission repair shop	49
14	03062	Former Warehouse Distributing (605 N. Magnolia St.)	No	No	No - One UST removed in 1991. Release reported 12/31/1991. NFA on 8/29/1994. Area is now a parking lot. No issues observed near roadway ROW.	93	Former Warehouse Distribuiting	48
15	03067	Former Opal 25 Freds Gas Station/Convenience Store (202 E. 5th N. St.)	No	No	No - Seven USTs removed 9/21/1991. One release reported 1/2/1990. NFA on 5/9/2007. No monitoring wells observed (in use or abandoned). No issues observed near the roadway ROW.	90	Former Opal 25 Gas Station	52
16	09553	Former Goodyear Tire & Rubber Co. (211 E. 5th N. St.)	No	No	No - One UST removed 12/19/1994. One release reported 2/9/1995. NFA on 4/21/1995. No monitoring wells observed (in use or abandoned). No issues observed near the roadway ROW.	96	Richard's Auto Shop	52
17	12743	Former Summerville Sports Marine (210 E. 5th N. St.)	No	No	No - Two USTs removed 9/12/1991. Release reported 12/30/1991. NFA on 12/20/2000. Several abandoned monitoring wells observed. SCDHEC representative stated that there was one active monitoring well at this site. The monitoring well was observed ~44' from Gum Street. No issues observed near roadway ROW except as noted above.	92	Swift Car Audio & The Door Christian Fellowship Ministries	52
18	17476	County Electric Supply Co. (320 E. 5th N. St.)	No	No	No - One UST removed 7/22/1998. Release reported 8/20/1998. NFA on 12/13/1998. Tank was last used in 1973. No issues observed.	103	CES Co.	57
19	19799	Spinx 359 Gas Station/Convenience Store (396 E. 5th N. St.)	Yes	No	No - Two USTs in service. No releases reported. USTs are located ~26' from sidewalk along Berlin Myers Parkway.	175	Spinx Gas Station	66
20	11953	Former C O Auto Exxon Service Station (405 E. 5th N. St.)	No	Yes	**Yes** - Eight USTs removed 12/20/1991. Release reported 12/31/1991. No NFA yet. Multiple monitoring wells observed at site and offsite. One monitoring well was observed ~17.5' from roadway US 78. SCDHEC representative indicates that there may be other offsite monitoring wells along area toward Saw Mill Branch on both side of the roadway.	109	DisasterCare Fire & Flood Specialists	66
21	02956	Former American Bakeries Co. (409 E. 5th N. St.)	No	No	No - One UST removed 5/6/1992. Release reported 10/25/1993. NFA on 2/2/1995. No issues observed.	109	No bakery anymore.	68
